

HALO CURVE

halo CURVE

A beautifully designed, decorative flykiller, the Halo Curve from Insect-O-Cutor is the perfect addition to front-of-house areas.

The elegant shaped facade is punctuated by stylish detailing, hiding caught flies from the view of customers in restaurants, hotels, cafes and bars, and finished with cobalt grey UV stable polycarbonate edging.

Easy to service, the front guard pivots to allow quick and easy tool free access to the two 15W tubes and glueboard, without the need to remove the guard during servicing.
